### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 04 November 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

The election of species of record is maintained for the reasons of record.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 29, 33, 36-42, 51, 54-60 and 70-73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hammarstrom et al. or Wadstrom in view of Robertson et al. or WO 92/22309 and further in view of Akinson et al.

Applicant argues that the references do not teach using the components for the same purpose but this is simply false. It is clear from the references themselves that they are all used for wound healing. Further applicant argues that the elastase inhibitor is not taught in Hammarstrom or Wadstrom. This is why the rejection under 35 USC 103.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208

Art Unit: 1654

USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

The references teach that the components of the claimed composition are known individually in the art for the same purpose, namely, wound healing. Since this is true, the rejection is maintained.

Applicants argue that the term wound healing is a genus and that there are many different types of wound healing. The references each individually in the art show that the components are each individually known in the art for wound healing. Applicants comments stating that different types of wound healing are taking place in the references is not understood. The references each teach using the components for the same purpose, namely wound healing. Wound healing is wound healing. One of ordinary skill in the art would have been motivated to use the components together since they are known individually in the art for the same purpose, namely, wound healing.

Applicant next argues that there are unexpected results. After close inspection of the Examples and Figures it is clear that there simply are no unexpected results. Applicant directs the examiner to figures 3 and 4 and nowhere in these figures can such unexpected results be found. In fact, the best results seem to be when eglin is not used.

Applicant again argues that there are unexpected results and points to Figures 1 and 2 this time. The bar graphs referred to all have the same or similar values of the combination of eglin or aprotinin with fibrin adhesive (FA) and without eglin or aprotinin. While it is not clear what the fibrin adhesive is, it is not the same as fibrinogen which is

in the claims. Thus, there are no unexpected results. The results yielded from using eglin and FA or just FA alone, do not yield any surprising or unexpected results.

Applicant still tries to state that the art is non-analogous but the fact of the matter is that the art is clear on the common use of the individual components in the art that they can be used individually to treat wounds.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
